GarlicCard™ is a patterned card made of plastic, not unlike a credit card. The pattern is especially designed to grate garlic cloves. The result is a perfect purée that is easy to mix with other ingredients for the fresh taste of garlic in all types of dishes.

After use, GarlicCard™ is simply rinsed under running water.

FORM AND FUNCTION GarlicCard™ was developed by **Herman Rasmuson**,

inventor and former chef. The main designer is **Lisa Flodin**. The first collection “Basic” is designed by **Lisa Flodin** and **Sofia Ekvall**. The collection consists of eight basic colors that match all styles of kitchens.

GarlicCard™ was introduced at **R.O.O.M, Designtorget, Museum of Modern Art in Stockholm** and the **Louisiana Museum for Modern Art in Denmark**.
